The Supercharged **SS** is Here...

SS
SERIES SIX
six pin locking system

At last... BiLock's alternative six pin in-line series Australian Lock Company now offers additional restricted keyways [profiles]. Series Six comes with the quality you would expect from Australian Lock Company, manufacturer of BiLock high security locking cylinders.

Series Six in-line Range of Cylinders & Plugs

Series Six's Mark I range of plugs, which enjoyed such an unprecedented success for Australian Lock Company, has now been expanded to include a new range of economical cylinders and ergonomically designed coloured key heads. The coloured key heads provide Australian Lock's Agent network with the capacity to supply low priced master key systems that can be differentiated either door to door, or at each level within the master key system.

Incorporating all the features of Mark I, and known as Series Six Mark 2, the new range has additional features which enable it to compete for the market share in the broad ranging, medium security market in Australia.

Individual company logos may be coined into the key heads. The key has been designed with added material to give it a width which cannot be readily or easily manufactured from existing key blanks. Consequently, it should only be available from our approved Series-Six locksmiths.

Australian Lock Company manufactures Series Six barrels and keys within their Unanderra factory to ensure complete product integrity. The very latest key milling technology has been designed and purpose built for the Australian Lock Company to ensure the customer can be guaranteed the high quality expected from Australia's Award winning manufacturer of BiLock high security locking systems.

The Series Six Mark 2 range applies BiLock's precision manufacturing techniques to deliver the high quality, problem free security you have come to expect from Australian Lock Company, manufacturer of BiLock high security locking cylinders.

** Whilst every attempt has been made to ensure profile security, the Australian Lock Company provides no guarantee of security with design registration only.*

The New Mark 2 Series Six is supercharged with a wide range of new features to elevate the product's design status one-step closer to the superior, BiLock!

Take a look at just some of the features of the SS machine known as:
"Series Six - Mark 2"

- SS Mark 2 is produced by the privately owned & operated, Australian Lock Company which has been supplying locksmiths, all around Australia, for over 25 years!
- SS Mark 2 is manufactured with that same precision which has made BiLock an iconic high security lock brand in Australia.
- SS Mark 2 boasts a real designer-element, with 343 different combinations for the new, colour-coded key heads.
- SS Mark 2 offers an ergonomically shaped key head strategically designed to bolster the status for Series Six, looking more like its superior master keying option, BiLock.
- SS Mark 2 has a indisputably strong, 3 mm thick, nickel silver key blank.
- SS Mark 2 key, affords locksmiths the space to identify coded keys & contact details.
- SS Mark 2 offers additional profiles for locksmiths to ensure restricted systems for selected, sizeable customers.
- SS Mark 2 provides lengthy legal coverage.
- SS Mark 2 offers 30 plus cylinders & plug types to retrofit most applications.
- SS Mark 2 is expected to become the "economical" master keying alternative to BiLock and other high security master keying systems.
- SS Mark 2 affords locksmiths a means of genuine control of in-line master key system.
- SS Mark 2 offers 3 panel keyheads which can be mixed and matched. 7 Colours to choose from (Black, Red, Green, Royal Blue, Orange, White & Silver).
